RAPID IMPROVEMENT WORKSHOPS

5S Workplace Organization

X-Ray Repair Planning ™

Process Mapping and Problem Solving

5S Workplace Organization

THE FIRST CRITICAL STEP TO IMPROVEMENT

5S Workplace Organization is an important foundation to any Lean initiative by providing an organized working environment capable of supporting and facilitating additional process improvements. Participants in a 5S Workplace Organization Rapid Improvement Workshop learn the steps and techniques for eliminating waste caused by disorganization and clutter while creating an ideal working environment. An effective 5S Workplace Organization initiative clearly communicates to the entire team the need for change at the most basic level and establishes a culture of discipline. The 5'S are Sort, Simplify, Systematic Clean, Standardize and Sustain. In a nutshell, this course teaches the steps for creating a working environment that provides the right resources, tools, and equipment in an organized manner resulting in improved efficiency, flow and throughput performance.

Lean for Collision

Re-Engineering the Processes for Success, Today and in the Future

Today's rapidly changing collision industry offers significant opportunities for the collision center that is equipped with the knowledge, expertise and commitment to evolve with emerging trends and meet the challenge of change head on.

MINIMUM REQUIREMENTS	Completion of MVP Green Belt and readiness to implement changes. Any PPG customer is eligible

Rapid Improvement Workshops

Rapid Improvement, it's about getting things done

A Rapid Improvement Workshop is a technique for quickly and effectively getting things done. During a Rapid Improvement Workshop you and your team will be lead by a MVP Black Belt facilitator through an on-the-floor workshop. Immediate results are realized through a hands-on effort, working directly on a planned scope project moving quickly from the Current State to a Future State.

A key focus of the Rapid Improvement Workshop is to teach the Leadership/Lean Champions at the shop how to use the technique enabling them to facilitate future, events on their own. PPG's MVP program offers a variety of Rapid Improvement Workshops as well as custom on-site consulting services.
