Administrative Process Re-Engineering

# Commercial Truck Refinish Area Optimization

## HOW TO MAXIMIZE THROUGHPUT AND PROFIT

Are you frustrated that your paint team cannot seem to meet the production demands placed upon them? Are you looking for insight into how you could increase the paint department's output? If it is not properly managed the paint booth can become the limiting factor for the entire business. This workshop will focus on improving paint booth utilization by working on the processes in and around these very valuable pieces of equipment. This approach addresses key contributing factors that drain production efficiencies and squash profits in the refinish area.

We will not only explore how these factors affect overall throughput and profitability but will also work through solutions to help you take your paint production to the next level. This includes a tool and process that will clearly define your process and communicate those expectations through the organization.

### Lean for Collision

#### Re-Engineering the Processes for Success, Today and in the Future!

Today's rapidly changing commercial truck collision repair industry offers significant opportunities for the collision center that is equipped with the knowledge, expertise and commitment to evolve with emerging trends and meet the challenge of change head on.

  - Measurement of booth cycles to identify improvement opportunities
  - Potential for the shop based upon equipment and personnel
  - Action plan designed to drive improvement
  - Team meeting to discuss & refine action plan and begin implementation

**MINIMUM REQUIREMENTS** Any PPG Commercial Truck customer is eligible for a workshop. Completion of MVP Commercial Truck Green Belt training with Data leading to the paint department as the area to begin

## Rapid Improvement Workshops

Rapid Improvement, it's about getting things done

A Rapid Improvement Workshop is a technique for quickly and effectively getting things done. During a Rapid Improvement Workshop you and your team will be lead by a MVP Black Belt facilitator through an on-the-floor workshop. Immediate results are realized through a hands-on effort, working directly on a planned scope project moving quickly from the Current State to a Future State.

A key focus of the Rapid Improvement Workshop is to teach the Leadership/Lean Champions at the shop how to use the technique enabling them to facilitate future, events on their own. PPG's MVP program offers a variety of Rapid Improvement Workshops as well as custom on-site consulting services.
