

X-Ray Repair Planning®

ELIMINATING FUTURE REPAIR DELAYS THROUGH EFFECTIVE PLANNING PROCESSES

X-Ray Repair Planning® is a key front end process for creating continuous repair flow through a collision repair center. This on-the-shop-floor workshop is effective at helping organizations get past the day to day obstacles which prevent proper execution. It will teach you the skills necessary to break free of the common implementation problems faced by many repair organizations while the team identifies the critical resources, structure, communication tools, and flow for repair planning excellence. Participants will learn the key elements of repair planning and make critical decisions for what needs to occur, how it will occur, when it will be done, and where things take place.

Today's rapidly changing collision industry

Re-Engineering the Processes for Success, Today and in the Future

Lean for Collision

offers significant opportunities for the collision center that is equipped with the knowledge, expertise and commitment to evolve with emerging trends and meet the challenge of change head on.
